

PROBLEM-SOLUTION FIT CANVAS

Project Design Phase • Maximum Marks: 2 Marks

Project Name: Online Complaint Registration System (MERN Stack)

Date: 4 August 2026

PURPOSE & OVERVIEW

Confirms that the problem identified for Online Complaint Registration's users is real and that the proposed MERN-based platform genuinely resolves it. It helps recognize existing behavioral patterns, build trust through transparent tracking, and optimize onboarding across citizen and officer channels.

1. CUSTOMER SEGMENT(S) • Citizens (18+): reporting civic/service issues needing resolution. • Officers/Staff: managing and resolving assigned complaints. • Admins: overseeing departments and platform operations.	6. CUSTOMER CONSTRAINTS • Limited digital literacy among some citizens. • Low initial trust that complaints will be acted upon. • Time pressure/frustration when reporting urgent issues. • Inconsistent internet connectivity or device access.	5. AVAILABLE SOLUTIONS • Phone hotlines & in-person complaint desks. • Generic email/paper-based complaint registers. • Social media posts tagging authorities. • Issues: Slow, fragmented, no tracking or accountability.
2. JOBS-TO-BE-DONE / PROBLEMS • File a complaint quickly without hassle. • Track complaint status and resolution progress. • Assign, prioritize, and resolve complaints efficiently (officer side).	9. PROBLEM ROOT CAUSE • No centralized digital platform interconnecting citizens, officers, and admins. • Complaint logging and tracking still done manually via calls and paper registers.	7. BEHAVIOUR • Citizens: call helplines repeatedly or visit offices in person. • Officers: maintain physical registers or spreadsheets for complaints. • Admins: compile department reports manually via email/calls.
3. TRIGGERS & 4. EMOTIONS • Triggers: a civic issue (garbage, road damage, water supply), a service failure, a safety concern, a follow-up need. • Emotions (Before/After): Before: frustrated, ignored, skeptical. After: relieved, heard, confident in the system.	10. YOUR SOLUTION • Online Complaint Registration: A MERN-based platform featuring: • Role-based access (Citizen, Officer, Admin). • Real-time complaint filing & status tracking. • Automated department routing & JWT authentication. • Admin oversight dashboard for accountability.	8. CHANNELS (ONLINE & OFFLINE) • 8.1 Online: Web/app portal, government website links, social media awareness campaigns. • 8.2 Offline: Municipal offices, help desks, word-of-mouth, community notices.
